Placement tips

- Place the solar panel in a location that consistently receives sunlight.
- The solar panel is set in place and does not move.
- The bracket's hinge allows 360° positioning (see **Figure 1**).
- The power cable is 10 feet long.

Mount your Solar Panel

- Step 1** Slightly loosen the hinge lock.
- Step 2** Screw the mounting bracket in place using the wall anchors if necessary (see **Figure 2**).
- Step 3** Attach the solar panel to the bracket by twisting the panel onto the panel mounting screw. Tighten the connection. Do not overtighten.
- Step 4** Adjust the angle of the solar panel and lock it in place by tightening the hinge lock. Do not overtighten.
- Step 5** Connect the power cable (**Figure 3**) to your camera or battery doorbell (**Figure 4**). Make sure the connection is snug to prevent water damage.
