Door / Window Sensors

Set Up Your Door / Window Sensors

1 **Choose a Location**

Doors: Place on the opening side (top or side), not the hinge side.

Windows: Place on the opening end (top, side, or bottom), not the fixed end.

2 Pair the Sensor

Clean and dry the mounting surface.

From the Panel home screen, select Settings (☰) → Devices → Add Device (+) → Door/Window Sensor.

Pull the battery tabs.

Name the sensor and select its location.

3 Install the Sensor and Magnet

Remove adhesive backing.

Align grooves of the sensor and magnet facing eachother within one-quarter inch. Press firmly.

Open and close the door or window to confirm alerts.

The sensor is now active.
