3 Pair with Panel

From the Panel home screen, select Settings (☰) → Devices → Add Device (+) → Smoke/CO.

Press the “Test” button on the Detector to trigger it.

Caution: Test button makes a loud noise. Use ear protection.

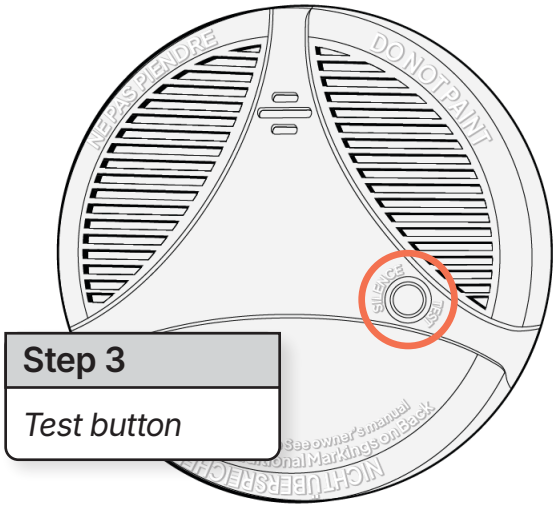
Select the device’s location and name it.

4 Install

Screw the mounting bracket to the ceiling.

Twist the detector into the bracket to fix it in place.

Record the installation date on the provided sticker.



Your Smoke & CO Detector is now active.
