Wireless Camera

Set Up Your Wireless Camera

1 **Charge the Camera**

Charge until the blue LED stops flashing.

2 **Pair the Camera**

From the Panel home screen, select Settings (☰) → Devices → Add Device (+) → Camera.

Press and hold the gray button on top of the camera to pair.

Join the network.

Name and select location.

Check live video in the app before mounting.

Continue to Step 3 →

3 Mount the Camera

Option 1: Hardware Mount

Screw pan head screw into wall.

Slide magnetic base onto screw.

Remove weatherproof plug and secure base with mounting screws.

Adjust view.

Option 2: Adhesive Mount (smooth surfaces only)

Clean and dry surface.

Apply adhesive to base.

Press firmly.

Wait 24–48 hours before attaching camera.

Option 3: Camera Stand (flat, angled, or hanging surfaces)

For flat surfaces, screw camera onto stand.

For angled or hanging surfaces, screw metal plate onto surface and attach stand magnetically.

Your camera is now installed and active.

Option 1

Mounting hardware

Option 1 & 2

Magnetic base is mountable with both hardware and adhesive.

Option 3

Versatile camera stand
