What is Included:

Mounting bracket	Stickers **(2)**
Smoke / CO detector	Wall anchors **(2)**
Screws **(2)**	3V Lithium battery

Placement tips

Place on flat surface.

See **Placement Diagrams** (pg. 13).

FIGURE 1
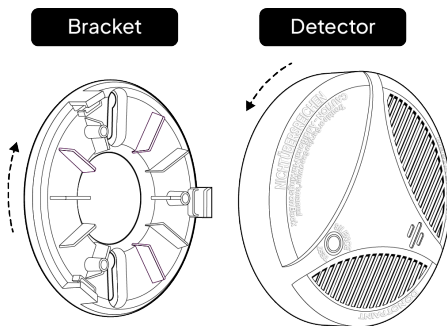

Bracket   Detector

Smoke / CO Detector

The ShieldPro Smoke / Carbon Monoxide (CO) detector's alarm sounds when either smoke or CO levels get too high.

Mount your Smoke / CO Detector

STEP 1

Remove the mounting bracket (see **Figure 1**).

STEP 2

Install the battery (see **Fig. 2**). Press the Test button on the smoke detector to test the battery (see **Fig. 3,** page 13).

STEP 3

Pair with the panel.

> **Settings** *(☰)* > **Devices** > **+** > *Select* **Smoke / CO** > *Follow the panel's instructions to pair your Smoke / CO Detector.*
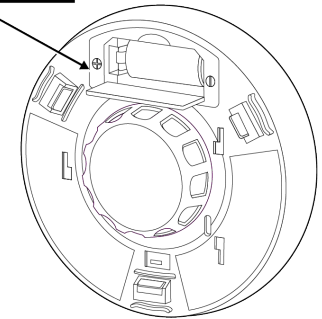

STEP 4

Choose a location for your Smoke / CO detector (See **Placement Diagrams**, page 13).

STEP 5

Use the bracket as a guide and determine where to place the screws (see **Fig. 4,** page 13).

FIGURE 2

Battery Compartment

STEP 6

Screw the mounting bracket into the ceiling. Use the wall anchors provided as needed.
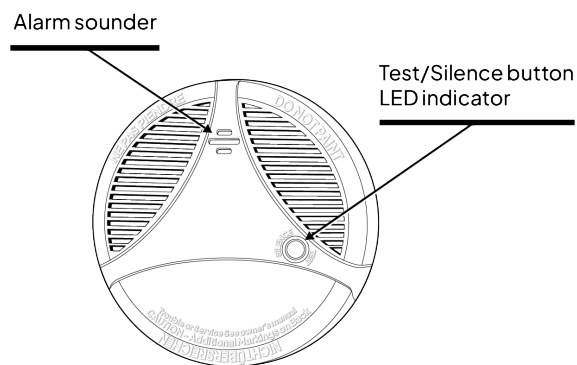

STEP 7

Use the provided date sticker to record the date installed and place it on the Smoke / CO detector.

STEP 8

Twist Smoke / CO detector onto the mounting bracket to fix it in place.
