

What is Included:

Mounting bracket
Solar panel with
10-foot cable
Wall screws (3)
Wall anchors (3)

Placement tips

Place the solar panel in a location that **consistently receives sunlight**. The solar panel is set in place and does not move. The bracket's hinge allows 360° positioning (see [Fig. 1](#)).

Solar Panel

The ShieldPro Solar panel provides solar power to wireless outdoor cameras and doorbells.

Mount your Solar Panel

STEP 1

Slightly loosen the hinge lock.

STEP 2

Screw the mounting bracket in place using the wall anchors if necessary (see [Figure 1](#)).

STEP 3

Attach the solar panel to the bracket by twisting the panel onto the panel mounting screw. Tighten the connection. Do not overtighten.

STEP 4

Adjust the angle of the solar panel and lock it in place by tightening the hinge lock. Do not overtighten.

Recommended: point the face of the solar panel to the area that receives the most sunlight.

STEP 5

Connect the power cable to your camera or wireless doorbell ([Fig. 2](#)). Make sure the connection is snug to prevent water damage.
