

Door / Window Sensor

The ShieldPro Door / Window Sensor fits alongside door frames and windowsills.

Mounting with Adhesive

STEP 1

Clean and dry the sensor location.

STEP 2

Remove all battery tabs from the sensor.

STEP 3

Pair with the panel.

Settings (☰) > Devices > + > Door or Window > Follow the prompts to pair the sensor.

STEP 4

Peel the protective backing off the sensor and press firmly against the surface. Repeat with the magnet.

Make sure the two grooved areas are facing each other.

Open (Triggered) Sensor

> .25" of separation

What is Included:

Magnet
Sensor
Wall screws (4)
Wall anchors (4)

Placement Tips

Indoor use only. Pair with the panel before mounting your sensor.

Place on the opening side of doors and windows (see Fig. 1 and Fig. 2).

The grooves must face each other (see Fig. 3).

Sensor and magnet must be 0.25 inches apart or less (see Fig. 4).
